

Guidelines for using Moodle

In order to view the courses and familiarize yourself with the content, it is easiest to log in as a guest. Clicking on the course link opens the Harno Moodle page (see the image below) and logging in as a guest opens the course preview.

In order to use the courses in your school's Moodle, we have created course backup files that you can download and then upload to your school's Moodle environment.

The image shows the Harno Moodle login interface. At the top, the text 'Harno Moodle' is centered. Below this, there are two input fields: 'Kasutajanimi' (Username) and 'Parool' (Password). A checkbox labeled 'Jäta kasutajanimi meelde' (Remember my name) is located below the password field. A blue button labeled 'Logi sisse' (Log in) is positioned below the checkbox. To the right of the input fields, there is a link 'Oled unustanud oma kasutajanime või parooli?' (Forgot your username or password?). Below this link, there is text: 'Teie brauseris peavad olema lubatud küpsisefailid' (Your browser must have cookies enabled) and 'Mõne kursuse puhul on külalisjuurdepääs lubatud' (Guest access is allowed for some courses). A red box highlights the 'Logi sisse külalisena' (Log in as a guest) button, with a red arrow pointing to it from the text 'Log in as a guest'. Below the highlighted button, there is a section 'Logi sisse kontoga:' (Log in with account) containing four buttons: 'Mobiil-ID', 'HarID', 'ID-kaart', and 'TAAT'. A red arrow points from the text 'Log in if you have a user' to the 'Logi sisse' button. Below the login section, there is a section titled 'Kas olete siin esmakordselt?' (Are you here for the first time?). Below this title, there is text: 'Sellele õpikeskkonnale täieliku juurdepääsu saamiseks peate looma kasutajakonto.' (To get full access to this learning environment, you need to create a user account). A button labeled 'Loo uus konto' (Create new account) is highlighted with a red box, and a red arrow points to it from the text 'Create a user'.
